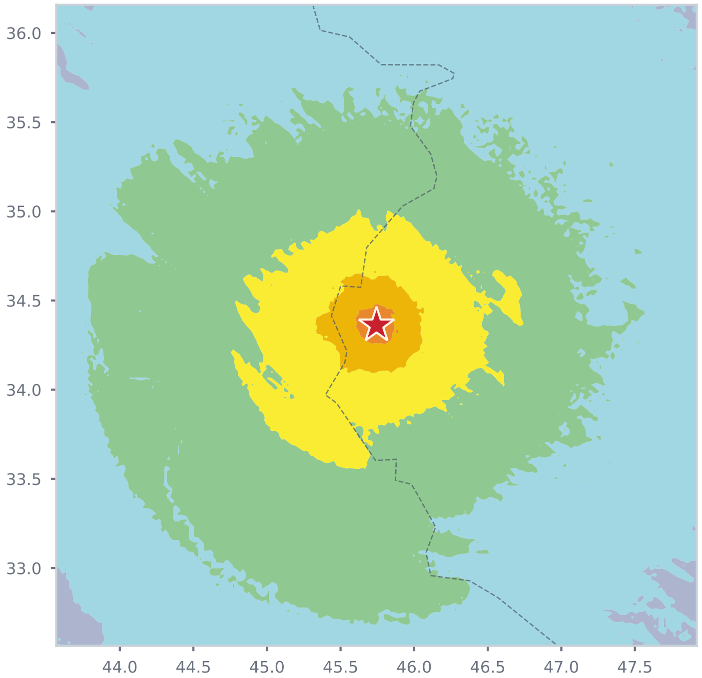
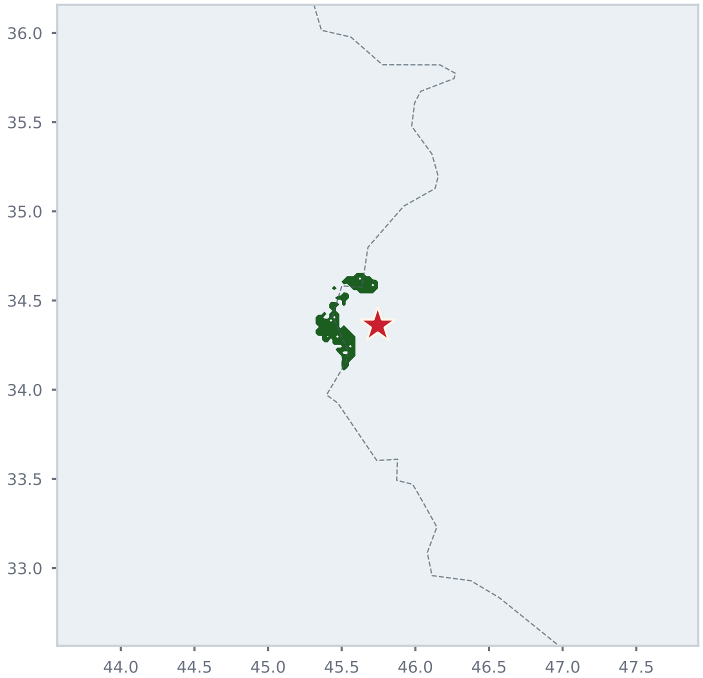
Shaking intensity (IMS-25)



Expected building damage grade



IMS-25 intensity

Expected damage grade (IMS-25)

Damage alert

**ORANGE** Widespread damage; many buildings unusable

**Provisional** **Transit occupancy**

Buildings heavily damaged (DG3 or worse): central estimate and 90% range

**13 million**
People in the shaken area

**3.4 million**
Buildings in the shaken area

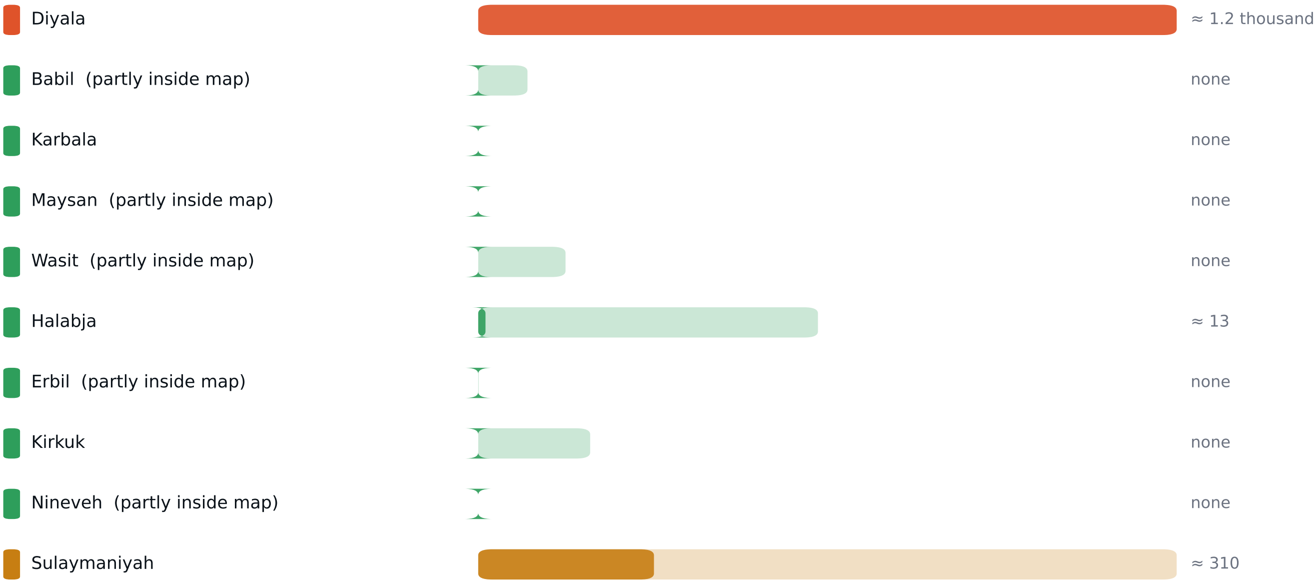
**1.8 thousand**
Heavily damaged (central estimate)

Building exposure modelled for: Iraq, Turkey. Shaded areas without exposure data are shown for shaking only.

Share of buildings in the mapped area by expected damage

Little or no damage: 100% Heavy damage: 0% Very heavy or collapse: 0%

## Provinces most affected: heavily damaged buildings, central estimate and 90% range



## How this report was made

### What this is, and what it is not

An automatic estimate of shaking and building damage from the earthquake's location and magnitude, adjusted with whatever station and felt-report data existed at the time. Ranges show the spread of 200 simulations of the shaking field, the building stock mix and the fragility curves. Building counts come from national models, not surveys: a district with an unusual building stock will be wrong in a way the range does not capture. Casualties are not published. Exact figures, grids and provenance: Bumelerze Atlas, https://peshawa-lh.github.io/bumelerze-atlas/events/us1000hwdw/v5/.
